(a)
Global Continental Islands
Adaptive sink radius
Africa
Australia
Europe & Eurasia
North & Central America
South America
$\beta = 1$
Global $\beta = 0.07 \pm 0.15$
$R^2 = 0.00$
$p = 0.64$
$N = 76$ basins
$\log_{10} M_{\text{total}}$ (accumulated pellets)
$\log_{10} P_{\text{urban}}$ (inhabitants in urban clusters)
(b)
Residuals $\epsilon = \log_{10} M - \log_{10} \hat{M}$
Residual slope = 0.12 ± 0.18
$R^2 = 0.01$
$p = 0.52$
$\log_{10} A$ (basin drainage area in km^2)
